EDUCATION

Pillai College of Engineering

Bachelor of Technology in Computer Engineering

Panvel, India

Year 2023 – Present

Pillai HOC College of Engineering and Technology

Diploma in Computer Engineering, 84.06%

Rasayani, India

Year 2020 – 2023

EXPERIENCE

Web Scraping Trainee

DCodeTech

July 2022 – Aug 2022

Thane, India

- Completed 45-day intensive training program in web scraping technologies and data extraction techniques
- Developed expertise in scraping GitHub repositories and user data using Python and BeautifulSoup
- Implemented automated data collection scripts for large-scale GitHub data analysis and processing
- Successfully extracted and structured complex data sets from various web sources with high accuracy

PROJECTS

LChat – Multilingual Chat Application | Javascript, React Native, Type Script, API's, Node Js

July 2025 – Present

- Currently developing real-time chat application supporting four languages with automatic language detection
- Building mobile-first architecture using Flutter with Firebase backend and Google Translate API integration
- Implementing user-selectable reply language feature for seamless multilingual communication

Review Summarizer | Python, Streamlit, NLP

Jan 2024 – May 2024

- Developed GUI-based application processing Excel review data and generating concise summaries using NLP techniques
- Implemented sentiment analysis and text processing algorithms to extract key customer feedback insights
- Created intuitive Streamlit interface enabling users to upload files and receive instant summarized results

Job Application Generator with LOR & Aptitude Test | Python, GenAI, Streamlit

Jan 2024 – Mar. 2025

- Built intelligent tool generating personalized job applications and recommendation letters using Generative AI
- Integrated comprehensive aptitude testing module with automated scoring and job readiness assessment
- Designed user-friendly Streamlit interface with document templates and instant PDF generation

Face Recognition Attendance System | Python, OpenCV, Tkinter, MySQL

Jan 2022 – May 2023

- Developed real-time facial recognition system achieving 95% accuracy for automated attendance tracking
- Implemented MySQL database integration with live video processing using OpenCV and Tkinter GUI
- Delivered as final year diploma project with comprehensive documentation and successful deployment

TECHNICAL SKILLS

Languages: Python, JavaScript, PHP, C, Java (Basics), HTML/CSS, SQL

Frameworks: Flask, Streamlit, Flutter, React

Developer Tools: Git, VS Code, PyCharm, Android Studio

Libraries: OpenCV, pandas, NumPy, BeautifulSoup, Tkinter

EXTRACURRICULAR ACTIVITIES

- 2 Gold Medals** in International Chinthana Drawing Competition with state rank (2016-17, 2017-18)
- Participated in **State Level Technical Competitions:** Diptech Euforia Quiz and Project Competition (2023)
- Certified in **Dr. Homi Bhabha Balvaidnyanik Competition** and **Maharashtra Pradnya Shodh Pariksha** (2015-17)
- Professional experience in **product testing** with Flipkart and **graphic design** for a clothing company
